work experience

VanOnGo Android Engineer

Apr 2023 - Present (12m)

- 1) Supported and maintained two high-load Android applications,
- 2) Responsible for developing, maintaining features, and bug fixing,
- 3) Maintaining and developing features for efficient location tracking, for custom user experience (Live Activity analogue),
- 4) 🛠️ Focused on system design and efficient code implementation,
- 5) 🛠️ Worked extensively with next Stack: Kotlin, Coroutines, StateFlow, Jetpack Compose, Koin, Decompose, UDF, MVI

alp.com Android Engineer

Dec 2022 - Mar 2023 (4m)

- 1) Supported and maintained, multi-module Android applications,
- 2) Focused on feature development, improvements, and issue fixing,
- 3) 🛠️ Stack: Kotlin, Coroutines, Flow, XML, Jetpack Compose, MVI, Charts, Firebase

Axles Android Engineer

Jul 2020 - Dec 2022 (2y,6m)

- 1) Creating apps from scratch, maintaining existing, refactoring,
- 2) Managed projects from different domains, led, investigated, and releases,
- 3) 📦 Involved into 6+ projects, started 2 of them.,
- 4) 🛠️ Stack: Kotlin, XML, Coroutines, LiveData, Flow, Room, Retrofit 2, Dagger2, Koin, Camera 2, ExoPlayer, MVVM, Services, Github Actions, Firebase, Fastlane

Trexoz Mobile Engineer

Oct 2019 - Jul 2020 (10m)

- 1) Led dual app projects; ensured delivery of high-quality applications on time.,
- 2) Developed client-specific features from concept to completion.,
- 3) 🛠️ Gained skills in app architecture with LiveData, MVVM, Kotlin, Coroutines, Data Binding, XML,
- 4) 📍 Implemented features with Google Maps, WebSockets

Infotechcentre Trainee Engineer

Jan 2019 - Oct 2019 (10m)

- 1) Developed Android apps using Kotlin and Java,
- 2) Created apps for warehouse usage and for corporate document management.,
- 3) Integrated apps with IoT, Custom view, complex features.,
- 4) 🛠️ Built a solid foundation in practical software engineering,
- 5) 🛠️ Stack: Kotlin, Java, Retrofit, Volley, AsyncTasks, MySQL, XML, Custom views

about

I'm **Nazar**, an *Android Software Engineer* 🧑‍💻. I have over **5 years** 📅 of experience in creating native applications for Android OS 📱. The experience includes creating applications for such domains as: **video media production** 🎬, **utility management** 🔧, **transport logistics** 🚚, and **fintech** 💰.

Technically, I'm cool with Kotlin and Java projects 💻, legacy XML projects 📁, or fresh Jetpack Compose 🍌. I love application architecture 🛠️ and implementing interesting features using camera 📷, notifications 🔔, services 📶, etc APIs 🌐.

Current stack: Kotlin, Services, Jetpack Compose, Decompose, Coroutines, Retrofit, Flow, Koin, Clean Architecture, Ktlint, CI/CD 🛠️.

skills

Kotlin, Java, Android SDK, Android XML, Android Jetpack, Jetpack Compose, Kotlin Coroutines, Gradle, Git, REST API, CI/CD, Camera 2, MVVM, UDF, MVI, Bloc, Retrofit 2, OkHttp, Room, Flow, LiveData, SingleLiveEvent, Observer, Dagger, Hilt, Koin, Firebase Notifications, Auth, Firestore, Distribution, Json.
